Silikal flooring in the dairy farming industry

Expect more from your floor.

Jointless hygiene and easy cleaning

Silikal flooring on the dairy farm

Silikal flooring is lactic acid-resistant, a property which is especially valued in the dairy industry. Moreover, the various coating systems ensure optimum hygiene conditions, are free of joints, and are quick and easy to clean, as well as being extremely durable. The Wilhelmshof in Wehrheim/Taunus near

Frankfurt/Germany is already enjoying such benefits. The milking parlour was fitted with a blue and white reactive resin slip resistant floor with a sprinkling of coloured quartz and the feeding area was refurbished using pale green smooth surface flooring. The new floors were laid in no time.

Proven in the field
For over 55 years
On many million m²

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within two hours. A perfect way to keep your operation running wide open.

Expect more from your floor.
